

MEETING REPORT

Team Name: Food Ordering System Project Team

Date of Meeting: 13 March 2026

Start Time: 10:00

End Time: 10:45

Meeting Location: E-012

Moderator: Arjola Sula

Recorder: Arjola Sula

Other Members Present: Xhesika Toska ,Arjola Sula ,Aurelio Hysenaj ,Klara Hyrenaj, Imerr Meraj

Members Absent: Sofia Cala, Erjus Allka

Topics Discussed:

- The team discussed the functional and non-functional requirements of the *Food Ordering and Delivery System*.
- The discussion focused on how the system operates and how different users interact within the platform.
- The roles of users such as customers, restaurants, delivery drivers, administrators, and finance managers were explained in terms of their interaction with the system.
- The overall workflow of the system was described, from browsing and ordering to delivery completion.
- The team also discussed non-functional aspects such as system security, performance, reliability, and user experience.

Decisions Made

- The system will include clearly defined functionalities for each user role.
- Both functional and non-functional requirements will be considered equally important in system design.
- The system will be designed to ensure high performance, security, and scalability.
- User experience and ease of use will be a key priority in development.

Tasks Assigned:

All team members were assigned to collaboratively develop and refine Use Cases, contribute to the creation of the Use Case Diagram, and ensure alignment between system functionalities, database design, and user interface.

Arjola Sula: Presented and explained the customer requirements, describing how users interact with the system, including browsing, ordering, and managing their overall experience within the platform.

Xhesika Toska: Presented the restaurant staff requirements, explaining how restaurants manage their profiles, update menus, handle orders, and monitor their performance within the system.

Klara Hysenaj: Presented the delivery driver requirements, explaining how drivers manage delivery requests, navigate routes, update delivery status, and communicate with customers during the delivery process.

Imerr Meraj: Presented the administrator requirements, explaining how administrators manage user accounts, monitor system activity, handle complaints, and oversee the overall operation of the platform.

Aurelio Hysenaj: Presented the finance manager requirements, explaining how financial operations are handled, including managing transactions, generating reports, tracking refunds, and overseeing the overall financial performance of the system.

Time, Place, and Agenda for Next Meeting:

Next Meeting Date: 26 March 2026

Location: E-012

Agenda:

Define and refine Use Cases, design the Use Case Diagram, and prepare initial drafts for review and presentation.
